DETAILED ACTION

1. The Response to restriction requirement filed in Paper No. 11, October 23, 2003 has been received. According to the Response, Group IV and Species D, which correspond to claims 4, 8, 14, and 18, have been elected without traverse. Currently, claims 1-20 are pending in this application, wherein claims 1-3, 5-7, 9-13, 15-17, 19, and 20 are withdrawn due to non-elected inventions. Claims 4, 8, 14, and 18 are hereby examined on the merits. Acknowledgment has been made.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 4 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Stronach (US Patent Application Publication 2002/0142816 A1).

Stronach teaches a system and method of providing a user interface for interactive wagering, comprising: a user input device (Figures 4 and 5) that accepts user inputs for receiving a selection of a default wager from a user; and a control circuitry that automatically placing the default wager on behalf of the user (page 5, paragraph 45). See also paragraphs 35-44.

Art Unit: 3713

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stronach (US Patent Application Publication 2002/0142816 A1).

Stronach teaches all limitations of claims 4 and 14. Stronach further teaches the wagering processor employs a default wager amount and the quick pick race contestants. Stronach does not explicitly teach the limitation of control circuitry receiving a selection of a previously selected track to be a default setting of the default wager, however, it is obvious to reuse or reselect a previously picked parameter, i.e., track or contestants in a racing game.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to provide Stronach's wagering system a default wager having a previously selected parameter such as a track to speed up an automatic wager process in a race game machine, thus bring more excitement to the game and attract more game players.
